

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### World Equity Fund, a sub fund of CBIS Global Funds plc, Class A (EUR) IE00BKRTPF98

## OBJECTIVES AND INVESTMENT POLICY

The fund seeks to achieve growth of your investment by investing mainly in shares and other equity securities (including ordinary shares, common stock, preferred stock convertible securities) issued by companies worldwide that have medium to large market capitalisation (value), i.e. over € 0.35 billion.

These companies will generally be established in developed countries. The fund will be diversified across companies in different industry sectors.

The fund may invest up to 30% in shares of companies established in emerging market countries; no more than 3% of fund's NAV shall be invested in Russia.

The fund only invests in accordance with Catholic responsible investing principles.

The fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). The fund may do so in order to invest more efficiently (for example to reduce risks or costs).

For more information about the fund's investment policy, see "**Investment Objectives and Policies of the Funds**" in the fund's prospectus available at [www.cbisonline.com](http://www.cbisonline.com).

The fund seeks to outperform the MSCI All Country World (EUR) Index (the "Benchmark"). The Investment Manager believes that the Benchmark is an appropriate benchmark for the fund over a full market cycle, typically 5 to 7 years. The fund is actively managed. While the majority of the fund's securities may be components of the Benchmark, the fund's Investment Manager may use its discretion to invest a material proportion of the fund in securities not included in the Benchmark and apply weightings entirely different to that of the Benchmark. As outperformance of the Benchmark is a target and not a forecast, there can be no guarantee or assurance that the fund will achieve a return which meets or exceeds any change in the Benchmark.

The fund does not declare dividends. Any income arising from the fund is reinvested in the fund.

You may redeem your shares on any working day on which Irish banks are open by submitting your request to the administrator by 9.00 p.m. (Irish time).

This fund may not be appropriate if you plan to withdraw your investment within five years

## RISKS AND REWARD PROFILE

Lower risk ← Higher Risk  
Typically lower rewards      Typical higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

These numbers rate how the fund may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also means a larger risk of losses. The lowest category does not mean a risk free investment.

The risk and reward category for this fund is not guaranteed to remain unchanged, and may shift over time.

Historical data, used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund.

The Fund is in category 6 as it invests in equities that may experience frequent price movements (volatility). The risk and reward category indicated above reflects the historical volatility of shares held by the Fund.

Other potential risks:

- Liquidity risk - the risk that a security held by the fund cannot be traded quickly enough in the market to prevent a loss.

- Currency risk - the risk that foreign exchange rates will change, which may affect the value of an asset held in any currency other than Euro.

- Emerging market risk - the fund may invest in emerging market countries. Such investments are subject to greater risk due to political, economic, corporate governance, legal market, accounting and other risks. Assets may not be properly held in custody and, as a result, may be lost. It may be more difficult to sell assets at a fair price in emerging market countries.

- Securities risk - investing in equity securities involves issuer, market, industry and general economic related risks.

- Investment risk - there can be no assurance that the Fund will achieve its investment objective.

See also the description of the risks applicable to the fund in "Risk Factors" in the fund's prospectus.

## CHARGES FOR THIS FUND

One-off charges taken before or after you invest

Entry charge None  
Exit Charge 3.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the fund over a year
