## What is this product?

#### Type:

This product is a UCITS Fund.

#### Term:

Open Ended Fund.

#### Objectives:

The fund seeks to achieve growth of your investment by investing mainly in shares and other equity securities (including ordinary shares, common stock, preferred stock convertible securities) issued by companies worldwide that have medium to large market capitalisation (value), i.e. over € 0.35 billion.

#### Intended retail investor:

This product is intended for investors who are prepared to take on a moderate level of risk of loss to their original capital in order to get a higher potential return, and who plan to stay invested for at least 5 years. It is designed to form part of a portfolio of investments. The Fund invests in equities that may experience frequent price movements (volatility).

## What are the risks and what could I get in return?

#### Risk Indicator

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level and poor market conditions could impact the value of your investment.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product's Annual Report or Prospectus available at [www.cbisonline.com](http://www.cbisonline.com).

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor / and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

## What happens if Christian Brothers Investment Services, Inc. is unable to pay out?

The Fund's assets are legally separated from the PRIIP Manufacturer's. The Fund's assets are held by the Depositary. You may face a financial loss in the event of a default, insolvency or compulsory wind-up of the Depositary. However, this risk is mitigated to a certain extent by the fact that the Depositary is required to segregate its own assets from the assets of the Fund. Losses are not covered by any investor compensation or guarantee scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is USD 10,000.

Investment USD 10,000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	129 USD	936 USD
<b>Annual cost impact (*)</b>	1.3%	1.3%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.5% before costs and 9.2% after costs.
