3-Month / YTD Review

- Outperformance was driven primarily by stock selection.
- Materials was the effective sector for stock selection.
- Not owning certain underperforming stocks within materials contributed positively.
- Sector allocation also added value, with contributions from overweighting financials and underweighting health care.

Current Positioning

- There is a distinct tilt to small and mid-cap names. The weighted average market cap is less than half that of the benchmark.
- The overall P/E and P/B ratios for the portfolio are lower than the benchmark.
- The largest underweight is in health care.

There are risks associated with investing, including possible loss of principal.

The fund invests in equity securities, which involve issuer, industry, market and general economic related risks. Additionally, since the fund is focused outside of the United States, US-based investors could be affected by additional volatility as a result of international factors including economic, political and currency risks.

Please read the Fund's prospectus for specific details regarding the Fund's risk profile."

The fund is actively managed and uses the MSCI Europe (EUR) (Gross) (the "Benchmark") for performance comparison purposes and for risk management purposes. While a significant proportion of the fund may be components of and have similar weightings to the Benchmark, the Sub-Investment Manager may use its discretion to invest a significant proportion of the fund in assets which are not included in the Benchmark or with weightings different to that of the Benchmark. There can be no guarantee that the fund will match or exceed the performance of the Benchmark.
