Before you invest, you may want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <https://cbisonline.com/us/>. You can also get this information at no cost by calling 866-348-6466, by sending an e-mail request to CRIFund@seic.com, or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus and statement of additional information, both dated December 6, 2021, as they may be amended from time to time, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website, phone number or e-mail address noted above.

Investment Objective

The Catholic Responsible Investments Bond Fund (the "Fund") seeks current income and long-term capital appreciation.

Fund Fees and Expenses

These tables describe the fees and expenses that you may pay if you buy, hold, and sell Investor Shares and Institutional Shares of the Fund. You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Institutional Shares, which are not reflected in the table or the example below.

Shareholder Fees (fees paid directly from your investment)

Redemption Fee (as a percentage of amount redeemed, if shares redeemed have been held for less than 30 days)	2.00%
--------------------------------------------------------------------------------------------------------------	-------

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor Shares	Institutional Shares
Management Fees	0.30%	0.30%
Other Expenses ¹	0.20%	0.05%
Shareholder Servicing Fee	0.15%	None
Other Operating Expenses	0.05%	0.05%
Total Annual Fund Operating Expenses ²	0.50%	0.35%

¹ Other Operating Expenses are based on estimated amounts for the current fiscal year.

² Christian Brothers Investment Services, Inc. (the "Adviser") has contractually agreed to waive fees and reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding Shareholder Servicing Fees, interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, dividend and interest expenses on securities sold short, acquired fund fees and expenses, fees and expenses incurred in connection with tax reclaim recovery services, other expenditures which are capitalized in accordance with generally accepted accounting principles, and other non-routine expenses, such as litigation expenses (collectively, "excluded expenses")) from exceeding 0.37% of the average daily net assets of the Fund's Investor Shares and Institutional Shares until October 31, 2023 (the "contractual expense limit"). In addition, the Adviser may receive from the Fund the difference between the Total Annual Fund Operating Expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the date of the recoupment if at any point Total

Annual Fund Operating Expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment. This agreement may be terminated: (i) by the Board of Trustees (the "Board") of Catholic Responsible Investments Funds (the "Trust"), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on October 31, 2023.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses (including capped expenses for the period described in the footnote to the fee table) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years
Investor Shares	\$51	\$160
Institutional Shares	\$36	\$113

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the example, affect the Fund's performance. During its most recent fiscal year, the Predecessor Fund's (as defined in "Performance Information" below) portfolio turnover rate was 115% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in fixed income securities and other debt instruments. The Fund's assets are allocated across different fixed-income market sectors and maturities. For purposes of the Fund's 80% investment policy, fixed-income securities and debt instruments include mortgage related securities, including mortgage-backed securities ("MBS") and adjustable rate mortgages ("ARMs"); U.S. and non-U.S. corporate debt securities; Yankee Bonds (dollar-denominated obligations issued in the U.S. by non-U.S. banks and corporations); fixed income securities issued or guaranteed by the U.S. government, non-U.S. governments, or by any U.S. government or non-U.S. government agency or instrumentality; municipal

bonds; asset-backed securities; debt issuances of REITs; convertible bonds; preferred stock; covered bonds and bonds issued by U.S. colleges and universities; leveraged bank loans; commercial paper; floating rate notes and other securities included in the Index (defined below). The Fund may enter into repurchase agreements covering the foregoing securities. The Fund may invest up to 10% of its assets in debt securities that are rated below investment grade (commonly referred to as "high-yield" or "junk bonds"). The Fund's fixed income securities may include unrated securities, if deemed by the Sub-Advisers to be of comparable quality to allowable investment grade and non-investment grade securities. A mortgage dollar roll is a transaction in which the Fund sells mortgage-related securities for immediate settlement and simultaneously purchases the same type of securities for forward settlement at a discount. The Fund may purchase or sell securities which it is eligible to purchase or sell on a when-issued and delayed-delivery basis and may make contracts to purchase or sell such securities for a fixed price at a future date beyond normal settlement time (forward commitments), including to be announced MBS ("TBA"). The purchase or sale of securities on a when-issued basis or on a delayed delivery basis or through a forward commitment involves the purchase or sale of securities by the Fund at an established price with payment and delivery taking place in the future. Some of these investments in derivatives will cause the Fund to be, in part, indirectly exposed to companies that would otherwise be screened out by the Adviser's Catholic Responsible Investments screening criteria. Accordingly, the Fund limits such investments to situations where they (a) do not constitute, in the aggregate, more than 5% of the Fund's investments at any time, and (b) where the Adviser determines such investments are necessary to achieve the Fund's investment objective and when the Adviser believes there are no reasonable alternative investments that exist that are consistent with its Catholic Responsible Investing screening criteria.

The Fund will invest primarily in securities denominated in U.S. dollars. The Fund may invest in securities issued by foreign entities, including emerging market securities, and obligations of corporations, non-U.S. governments or their subdivisions, agencies, government-sponsored enterprises, foreign local government entities, and supnationals. The Fund may invest in futures, primarily U.S. Treasury futures. The Fund may buy or sell futures to manage the Fund's portfolio duration, yield curve positioning or trade execution on a more cost effective basis than by use of physical securities alone. The Fund may not purchase private placement securities except for securities eligible for re-sale under Rule 144A of the 1933 Act. The Fund may engage in active and frequent trading of portfolio securities to achieve its principal investment strategies.

The Fund uses a multi-manager approach, relying upon a number of sub-advisers (each, a "Sub-Adviser" and collectively, the "Sub-Advisers") with differing investment philosophies to manage portions of the Fund's portfolio under the general supervision of the Adviser. The Sub-Advisers actively manage the duration of the Fund and purchases securities such that the

average weighted duration of the Fund's portfolio will typically be within a range of +/- 20% of the Bloomberg U.S. Aggregate Bond Index (the "Index"). The Fund defines duration by reference to the Index.

Brandywine Global Investment Management, LLC ("Brandywine Global")

Brandywine Global takes a top-down, macro, value-oriented approach to fixed income investing. Given the size of the U.S. economy and its deep interconnectedness with the global economy via trade, financial, central bank, and USD dependency, Brandywine Global seeks to understand the U.S. business and monetary cycles in relation to the broader global macro-economic picture as opposed to solely in isolation.

The Brandywine Global - U.S. Fixed Income ("USFI") strategy utilized in the Fund is a U.S.-only strategy that emphasizes active duration management as a key alpha driver, supplemented by trigger-based allocations to investment grade credit when spreads have widened. Portfolio duration will be managed within a range of +/-2.5 years of the Bloomberg 1-5 Year Government Credit Index. When investing in fixed income securities, Brandywine Global has a natural bias to own medium- to longer-dated fixed-rate bonds. Brandywine Global has the flexibility to reduce portfolio duration should it believe duration risk poses a significant threat to capital preservation. Brandywine Global invests primarily in U.S. government securities and investment-grade corporate credit. Brandywine Global accepts meaningful credit risk only after spreads have widened and the opportunity exists to invest in credit sectors trading at a discount, profiting as spreads normalize. Typically, the USFI strategy has employed limited use of derivatives. However, Brandywine Global has the option to use futures to adjust duration within the normal guideline bands. Credit default swaps are allowed for managing credit exposure or trading execution on a more cost-effective basis than by use of physical securities alone.

To avoid the inefficiencies of multi-sector U.S. bond benchmarks, the Brandywine Global portfolio management team takes a benchmark-agnostic approach that limits investment to only the few sectors and issues considered most attractive. The primary objective of the USFI strategy utilized in the Fund is to seek to outperform the Bloomberg 1-5 Year Government Credit Index over a full market cycle in differentiated ways than Brandywine Global's peers while preserving the diversification benefits of core bonds (e.g. minimizing domestic equity correlations during periods of heightened market volatility).

Dodge & Cox

Dodge & Cox will invest primarily in U.S. fixed income securities, including, but not limited to, U.S. government and agency securities, corporate bonds, and mortgage- and asset-backed securities. Dodge & Cox will also invest in below investment grade securities and U.S. dollar-denominated debt of

non-U.S. issuers, including corporate, sovereign, foreign agencies, foreign local government entities, and supranationals.

Dodge & Cox seeks to construct and manage a portfolio of securities selected through bottom-up fundamental analysis and with an emphasis on valuation. By combining fundamental research with a long-term investment horizon, Dodge & Cox seeks to uncover and act upon inefficiencies in the relative valuations of individual securities. Dodge & Cox's credit research focuses on the factors it believes can influence an individual issuer's creditworthiness and any downside protection that exists. At the security level, Dodge & Cox's analysis emphasizes the terms and conditions and structural characteristics of each instrument. Dodge & Cox also considers economic trends and special circumstances that may affect an industry or a specific issuer or issue.

Sun Life Capital Management (U.S.) LLC ("SLC Management")

The portion of the Fund managed by SLC management has an overall investment objective to seek total return versus the Bloomberg U.S. Aggregate Bond Index while providing protection against interest rate risk. SLC Management attempts to accomplish these investment objectives by investing in U.S. dollar denominated, investment grade fixed income securities. The long term objective of the account is to outperform the Bloomberg U.S. Aggregate Bond Index when measured over 3-to-5 year periods. The sensitivity to interest rate changes is intended to track the market for domestic, investment grade fixed income securities. The effective duration of the account's investment portfolio at the end of each calendar month during a fiscal year will typically be within half a year of the benchmark. The primary strategies utilized for value add are sector rotation, issue selection, and yield curve positioning.

Catholic Responsible Investing

The Fund will invest its assets in a manner consistent with the components, details and definitions of Catholic Responsible Investing ("CRI") as adopted from time to time by the De La Salle Brothers of the Christian Schools. CRI is an investment strategy designed specifically to help investors seek sound financial returns while remaining faithful to the teachings of the Roman Catholic Church. The components and details of CRI are intended to reflect both the charism (or founding spirit) and the current teachings of the Roman Catholic Church and, as such, the components and details are as adopted from time to time by the De La Salle Brothers of the Christian Schools, currently through the action of its civil entity, the Adviser.

CRI blends core Roman Catholic Church teaching with a disciplined, diversified investment process aimed at delivering competitive, risk-adjusted returns over time. Currently, the three components of CRI are Catholic investment screening, active ownership and diversified investment management. For more information about the Fund's policy to invest consistent with CRI and these three components, please see the section of the Fund's Prospectus

entitled “More Information about the Funds’ Investment Objectives, Principal Investment Strategies and Principal Risks, Fundamental Investment Policy of Catholic Responsible Investing.”

As part of the Fund’s Catholic Responsible Investing Process, the Adviser maintains a master list of global securities that are restricted from inclusion in the Fund’s portfolio. While the Catholic Responsible Investing screening criteria are designed to exclude certain companies or investments from the potential investment universe because these companies operate businesses deemed inconsistent with Catholic values, the Adviser does not anticipate this reduction to have a material impact on the Fund’s ability to achieve its investment objective. The Adviser seeks to balance the impact of the Catholic Responsible Investing screening criteria by either overweighting select portfolio holdings or substituting additional holdings so that the Fund’s overall portfolio composition is adjusted to achieve its investment objective. As a result, Fund performance may be different than a fund with a similar investment strategy that does not invest in accordance with Catholic Responsible Investing screening criteria.

Principal Risks

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the FDIC or any government agency.**

Fixed Income Market Risk — The prices of the Fund’s fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness of individual issuers, including governments and their agencies. Generally, the Fund’s fixed income securities will decrease in value if interest rates rise and vice versa. In a low interest rate environment, risks associated with rising rates are heightened. Declines in dealer market-making capacity as a result of structural or regulatory changes could decrease liquidity and/or increase volatility in the fixed income markets. Broad movements in financial markets may adversely affect the price of the Fund’s investments, regardless of how well the companies in which the Fund invests perform. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund’s performance and cause losses on your investment in the Fund.

Credit Risk — The credit rating or financial condition of an issuer may affect the value of a fixed income security. Generally, the lower the credit quality of a security, the greater the perceived risk that the issuer will fail

to pay interest fully and return principal in a timely manner. If an issuer defaults or becomes unable to honor its financial obligations, the security may lose some or all of its value.

Duration Risk — The longer-term securities in which the Fund may invest tend to be more volatile than shorter-term securities. A portfolio with a longer average portfolio duration is more sensitive to changes in interest rates than a portfolio with a shorter average portfolio duration.

The concept of duration is useful in assessing the sensitivity of a fixed income fund to interest rate movements, which are usually the main source of risk for most fixed income funds. Duration measures price volatility by estimating the change in price of a debt security for a 1% change in its yield. For example, a duration of five years means the price of a debt security will change about 5% for every 1% change in its yield. Thus, the higher the duration, the more volatile the security.

Interest Rate Risk — As with most funds that invest in fixed income securities, changes in interest rates could affect the value of your investment. Rising interest rates tend to cause the prices of fixed income securities (especially those with longer maturities and lower credit qualities) and the Fund's share price to fall. Very low or negative interest rates may prevent the Fund from generating positive returns and may increase the risk that if followed by rising interest rates the Fund's performance will be negatively impacted.

Prepayment and Extension Risk — When interest rates fall, issuers of high interest debt obligations may pay off the debts earlier than expected (prepayment risk), and the Fund may have to reinvest the proceeds at lower yields. When interest rates rise, issuers of lower interest debt obligations may pay off the debts later than expected (extension risk), thus keeping the Fund's assets tied up in lower interest debt obligations.

Foreign Company Risk — Investing in foreign companies, including direct investments and investments through depositary receipts and P-Notes, poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the U.S. Offerings of securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the "SEC") and foreign companies are generally not subject to the regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce income received from the securities comprising the Fund's portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the Fund to sell such investments at inopportune times, which could result in losses to the Fund.

While depositary receipts provide an alternative to directly purchasing the underlying foreign securities in their respective national markets and currencies, investments in depositary receipts continue to be subject to many of the risks associated with investing directly in foreign securities.

Emerging Markets Securities Risk — The Fund's investments in emerging markets securities, including A Shares of Chinese companies purchased through Stock Connect, are considered speculative and subject to heightened risks in addition to the general risks of investing in foreign securities. Unlike more established markets, emerging markets may have governments that are less stable, markets that are more concentrated and less liquid and economies that are less developed. In addition, the securities markets of emerging market countries may consist of companies with smaller market capitalizations and may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible restrictions on repatriation of investment income and capital. In certain emerging markets, governments have historically exercised substantial control over the economy through administrative regulation and/or state ownership. Furthermore, foreign investors may be required to register the proceeds of sales, and future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies.

Derivatives Risk — Futures contracts, forward contracts, options and swaps are subject to market risk, leverage risk, correlation risk and liquidity risk. Many over-the-counter ("OTC") derivative instruments will not have liquidity beyond the counterparty to the instrument. Leverage risk is the risk that a small percentage of assets invested in derivatives can have a disproportionately larger impact on the Fund's performance. Correlation risk is the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Forward contracts and swap agreements are also subject to credit risk and valuation risk. Valuation risk is the risk that the derivative may be difficult to value and/or may be valued incorrectly. Credit risk is described elsewhere in this section. Each of these risks could cause the Fund to lose more than the principal amount invested in a derivative instrument. Some derivatives have the potential for unlimited loss, regardless of the size of an initial investment. The other parties to certain derivative contracts present the same types of credit risk as issuers of fixed income securities. The use of derivatives may also increase the amount of taxes payable by shareholders. Both U.S. and non-U.S. regulators have adopted and are in the process of adopting and implementing regulations governing derivatives markets, the ultimate impact of which remains unclear.

Capital Gain Risk — As of the date of this Prospectus a substantial portion of the Fund's net asset value is attributable to net unrealized capital gains on portfolio securities. If the Fund realizes capital gains in excess of realized capital losses in any fiscal year, it makes capital gain distributions to shareholders. You may receive distributions that are attributable to

appreciation of portfolio securities that happened before you made your investment. Unless you purchase shares through a tax-advantaged account (such as an IRA or 401(k) plan), these distributions will be taxable to you even though they economically represent a return of a portion of your investment. You should consult your tax adviser about your investment in the Fund.

U.S. Government Securities Risk — The Fund's investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government, or its agencies or instrumentalities. Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. In addition, U.S. government securities are not guaranteed against price movements due to changing interest rates.

Repurchase Agreement Risk — In the event that the counterparty to a repurchase agreement is unwilling or unable to fulfill its contractual obligations to repurchase the underlying security, the Fund may lose money, suffer delays, or incur costs arising from holding or selling the underlying security.

Corporate Fixed Income Securities Risk — The prices of the Fund's corporate fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness and business prospects of individual issuers. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund.

Mortgage-Backed Securities Risk — Mortgage-backed securities are affected by, among other things, interest rate changes and the possibility of prepayment of the underlying mortgage loans. Mortgage-backed securities are also subject to the risk that underlying borrowers will be unable to meet their obligations.

Asset-Backed Securities Risk — Payment of principal and interest on asset-backed securities is dependent largely on the cash flows generated by the assets backing the securities, and asset-backed securities may not have the benefit of any security interest in the related assets.

High Yield Bond Risk — High yield, or "junk," bonds are debt securities rated below investment grade. High yield bonds are speculative, involve

greater risks of default, downgrade, or price declines and are more volatile and tend to be less liquid than investment-grade securities. Companies issuing high yield bonds are less financially strong, are more likely to encounter financial difficulties, and are more vulnerable to adverse market events and negative sentiments than companies with higher credit ratings.

Inflation Protected Securities Risk — Inflation protected securities are fixed income securities for which the principal and/or interest income paid is linked to inflation rates. They may be issued by the U.S. Treasury or foreign governments and U.S. and foreign corporations. The relationship between an inflation protected security and its associated inflation index affects both the sum the Fund is paid when the security matures and the amount of interest that the security pays the Fund. With inflation (a rise in the index), the principal of the security increases. With deflation (a drop in the index), the principal of the security decreases. Inflation protected securities pay interest at a fixed rate. Because the rate is applied to the adjusted principal, however, interest payments can vary in amount from one period to the next. If inflation occurs, the interest payment increases. In the event of deflation, the interest payment decreases. At the maturity of a security, the Fund receives the adjusted principal or the original principal, whichever is greater.

Floating Rate Securities Risk — The Fund may invest in obligations with interest rates that are reset periodically. Although floating rate securities are generally less sensitive to interest rate changes than fixed rate instruments, the value of floating rate securities may decline if their interest rates do not rise as quickly, or as much, as general interest rates. Floating rate securities are issued by a wide variety of issuers and may be issued for a wide variety of purposes, including as a method of reconstructing cash flows. Issuers of floating rate securities may include, but are not limited to, financial companies, merchandising entities, bank holding companies, and other entities. In addition to the risks associated with the floating nature of interest payments, investors remain exposed to other underlying risks associated with the issuer of the floating rate security, such as credit risk.

Adjustable Rate Mortgages Risk — ARMs contain maximum and minimum rates beyond which the mortgage interest rate may not vary over the lifetime of the security. In addition, many ARMs provide for additional limitations on the maximum amount by which the mortgage interest rate may adjust for any single adjustment period. Alternatively, certain ARMs contain limitations on changes in the required monthly payment. In the event that a monthly payment is not sufficient to pay the interest accruing on an ARM, any excess interest is added to the principal balance of the mortgage loan, which is repaid through future monthly payments. If the monthly payment for such an instrument exceeds the sum of the interest accrued at the applicable mortgage interest rate and the principal payment required at such point to amortize the outstanding principal balance over the remaining term of the loan, the excess is used to reduce the then-outstanding principal balance of the ARM.

In addition, certain ARMs may provide for an initial fixed, below-market or teaser interest rate. During this initial fixed-rate period, the payment due from the related mortgagor may be less than that of a traditional loan. However, after the teaser rate expires, the monthly payment required to be made by the mortgagor may increase dramatically when the interest rate on the mortgage loan adjusts. This increased burden on the mortgagor may increase the risk of delinquency or default on the mortgage loan and in turn, losses on the mortgage-backed securities into which that loan has been bundled.

Active Management Risk — The Fund is subject to the risk that the Sub-Advisers’ judgments about the attractiveness, value, or potential appreciation of the Fund’s investments may prove to be incorrect. If the investments selected and strategies employed by the Fund fail to produce the intended results, the Fund could underperform in comparison to other funds with similar objectives and investment strategies.

Catholic Values Investing Risk — The Fund considers the Adviser’s Catholic Responsible Investment criteria in its investment process and may choose not to purchase, or may sell, including at inopportune times which would result in losses to the Fund, otherwise profitable investments in companies which have been identified as being in conflict with the Adviser’s Catholic Responsible Investment criteria. This means that the Fund may underperform other similar mutual funds that do not consider these criteria when making investment decisions. In addition, there can be no guarantee that the activities of the companies identified by the Fund’s investment process will align (or be perceived to align) with the principles contained in the Adviser’s Catholic Responsible Investment criteria.

New Fund Risk — Because the Fund is new, investors in the Fund bear the risk that the Fund may not be successful in implementing its investment strategy, may not employ a successful investment strategy, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation.

Performance Information

The performance shown in the bar chart and performance table is the performance of another investment vehicle (the “Predecessor Fund”) prior to the commencement of the Fund’s operations. Class A Shares of the Predecessor Fund reorganized into Investor Shares, and Class B Shares and Class X Shares of the Predecessor Fund reorganized into Institutional Shares of the Fund on December 6, 2021. The Predecessor Fund was managed by the Adviser using investment policies, objectives and guidelines that were in all material respects equivalent to the management of the Fund. The Predecessor Fund performance information in the bar chart and table has

been adjusted to reflect Investor Shares expenses, and with respect to the table Institutional Shares. However, the Predecessor Fund was not a registered mutual fund and so it was not subject to the same investment and tax restrictions as the Fund. If it had been, the Predecessor Fund's performance may have been lower. Certain financial statements of the Predecessor Fund are provided in Appendix C to the Fund's Statement of Additional Information.

The bar chart and the Average Annual Total Returns table below provide some indication of the risks of investing in the Fund by showing changes in the Predecessor Fund's performance from year to year for the one, five and ten year periods and by showing how the Predecessor Fund's average annual returns compare with the returns of a broad-based securities market index. Past performance assumes the reinvestment of all dividend income and capital gains distributions. The Fund's current performance for the most recent month end can be obtained by calling 866-348-6466. The Fund's past performance is not necessarily an indication of how the Fund will perform in the future.

After-tax returns cannot be calculated for periods before the Fund's registration as a mutual fund and they are, therefore, unavailable.

Annual Total Return for Years Ended December 31

Best Quarter	Worst Quarter
5.65%	(2.54)%
6/30/20	12/31/2016

The performance information shown above is based on a calendar year. Year to date performance of Investor Shares (non-annualized and before taxes) as of September 30, 2021: (0.62)%.

CATHOLIC RESPONSIBLE INVESTMENTS BOND FUND	1 Year	5 Years	10 Years
Fund Returns Before Taxes			
Institutional Shares	10.16%	5.26%	4.39%
Investor Shares	9.99%	5.10%	4.23%
Bloomberg U.S. Aggregate Bond Index (reflects no deduction for fees, expenses or taxes)*	7.51%	4.43%	3.84%

* The Bloomberg U.S. Aggregate Bond Index is a broad based index that measures the investment grade, U.S. dollar denominated, fixed rate, taxable bond market.

Investment Adviser and Portfolio Managers

Christian Brothers Investment Services, Inc.

John Geissinger, CFA, Chief Investment Officer, has managed the Fund since its inception in 2021.

Hoa Quach, CFA, Managing Director, has managed the Fund since its inception in 2021.

Constance Christian, CFA, Managing Director, has managed the Fund since its inception in 2021.

Investment Sub-Advisers and Portfolio Managers

Brandywine Global Investment Management, LLC

Anujeet Sareen, Portfolio Manager, has managed the portion of the Fund's assets allocated to Brandywine Global Investment Management, LLC since 2021.

Jack McIntyre, Portfolio Manager, has managed the portion of the Fund's assets allocated to Brandywine Global Investment Management, LLC since 2021.

Brian Kloss, Portfolio Manager, has managed the portion of the Fund's assets allocated to Brandywine Global Investment Management, LLC since 2021.

Tracy Chen, Portfolio Manager, has managed the portion of the Fund's assets allocated to Brandywine Global Investment Management, LLC since 2021.

Dodge & Cox

Dana M. Emery, Chief Executive Officer, President, Director, and member of U.S. Fixed Income Investment Committee and Global Fixed Income Investment Committee, has managed the portion of the Fund's assets allocated to Dodge & Cox since 2021.

Thomas S. Dugan, Senior Vice President, Director, Director of Fixed Income, and member U.S. Fixed Income Investment Committee and Global Fixed Income Investment Committee, has managed the portion of the Fund's assets allocated to Dodge & Cox since 2021.

James H. Dignan, Vice President, Client Portfolio Manager, Research Analyst, and member of U.S. Fixed Income Investment Committee and Global Fixed Income Investment Committee, has managed the portion of the Fund's assets allocated to Dodge & Cox since 2021.

Anthony J. Brekke, Vice President, Client Portfolio Manager, and Research Analyst and member of U.S. Fixed Income Investment Committee, has managed the portion of the Fund's assets allocated to Dodge & Cox since 2021.

Adam S. Rubinson, Vice President, Client Portfolio Manager, Research Analyst, and member of U.S. Fixed Income Investment Committee and Global Fixed Income Investment Committee, has managed the portion of the Fund's assets allocated to Dodge & Cox since 2021.

Lucinda I. Johns, Vice President, Associate Director of Fixed Income, Research Analyst, and member of U.S. Fixed Income Investment Committee and Global Fixed Income Investment Committee, has managed the portion of the Fund's assets allocated to Dodge & Cox since 2021.

Nils M. Reuter, Vice President, Research Analyst, and Trader and member of U.S. Fixed Income Investment Committee, has managed the portion of the Fund's assets allocated to Dodge & Cox since 2021.

Michael Kiedel, Vice President and Research Analyst and member of U.S. Fixed Income Investment Committee, has managed the portion of the Fund's assets allocated to Dodge & Cox since 2021.

Sun Life Capital Management (U.S.) LLC

Purchase and Sale of Fund Shares

You may generally purchase or redeem shares on any day that the New York Stock Exchange ("NYSE") is open for business.

To purchase Institutional or Investor Shares of the Fund, you must generally invest at least the minimums presented below. Systematic planned contributions are required to be at least \$1,000.

Name of Fund	Investor Shares	Institutional Shares
Catholic Responsible Investments Bond Fund	\$5,000	\$5,000,000

The Fund reserves the right to waive the minimum investment amounts in its sole discretion.

If you own your shares directly, you may redeem your shares by contacting the Fund directly by mail at: Catholic Responsible Investments Funds, P.O. Box 588, Portland, ME 04112 (Express Mail Address: Catholic Responsible Investments Funds, c/o Atlantic Shareholder Services, LLC, Three Canal Plaza, Ground Floor, Portland, ME 04101) or telephone at 866-348-6466.

If you own your shares through an account with a broker or other financial intermediary, contact that broker or financial intermediary to redeem your shares. Your broker or financial intermediary may charge a fee for its services in addition to the fees charged by the Fund.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account ("IRA"), in which case your distribution will be taxed when withdrawn from the tax-deferred account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's web site for more information.
