Returns are presented net of fees and include the reinvestment of income and past performance is not indicative of future results. Net of fees includes management fees, operating expenses, and fee reductions and/or expense reimbursements. See the fund prospectus for additional information.

*Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be higher or lower than the performance quoted. For performance current to the most recent month end, please call 1-866-348-6466.*

Indices are unmanaged and do not include the effect of fees. One cannot invest in an index.

Performance data shown prior to 12/06/2021 is that of the funds of the Catholic United Investment Trust (the "Predecessor Funds"). The Predecessor Funds were managed by the Adviser using investment objectives, strategies, policies and restrictions that were in all material respects equivalent. The performance information has been adjusted to reflect Fund expenses which may result in higher or lower performance.

The Catholic Responsible Investments International Small-Cap Fund charges a 2% Redemption Fee (as a percentage of amount redeemed, if shares redeemed have been held for less than 30 days). Investment performance does not reflect the redemption fee; if it was reflected, the total return would be lower than shown.

# Catholic Responsible Investments International Small-Cap Fund

Q1 2025 FUND FACTS | ALL DATA AS OF 03/31/2025

**Before investing you should carefully consider the Funds' investment objectives, risks, charges and expenses. This and other information is available in the prospectus, or summary prospectus. Please read the prospectus carefully before you invest. The prospectus, or summary prospectus, can be obtained by calling 1-866-348-6466.**

Mutual fund investing involves risk, including possible loss of principal. There can be no assurance that the Fund will achieve its stated objectives. Current and future holdings are subject to risk. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume.

**Price/Book** is a ratio used to compare a stock's market value to its book value.

**Price/Earnings** is the ratio for valuing a company that measures its current share price relative to its per-share earnings. P/E helps to determine the relative value of a company's shares in an apples-to-apples comparison.

**Return on Equity** measures financial performance calculated by dividing net income by shareholders' equity. ROE measures how effectively management is using a company's assets to create profits.

**Sharpe Ratio** is a measure that indicates the average return minus the risk-free dividend by the standard deviation of return on an investment.

**Beta** is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. Beta is used in the capital asset pricing model (CAPM), a model that calculates the expected return of an asset based on its beta and expected market returns.

**Standard Deviation** measures the dispersion of a set of data from its mean. The more spread apart the data, the higher the deviation. Standard deviation is calculated as the square root of variance. In finance, standard deviation is applied to the annual rate of return of an investment to measure the investment's volatility. Standard deviation is also known as historical volatility and is used by investors as a gauge for the amount of expected volatility.

**Tracking Error** shows a discrepancy between the price behavior of a position or a portfolio and the price behavior of a benchmark.

The MSCI ACWI ex-US Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 26 Emerging Markets (EM) countries.

The securities identified and described do not represent all the securities purchased, sold, or recommended for CRI Funds and CBIS Global Funds. The reader should not assume that an investment in the securities identified was or will be profitable. For a complete list of securities offered during the period, please contact CBIS.

The Catholic Responsible Investments International Small-Cap Fund is distributed by SEI Investments Distribution Co. (SIDCO) which is not affiliated with CBIS.
