Returns are presented net of fees and include the reinvestment of income and past performance is not indicative of future results. Net of fees includes management fees, operating expenses, and fee reductions and/or expense reimbursements. See the fund prospectus for additional information.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be higher or lower than the performance quoted. For performance current to the most recent month end, please visit our website at www.cbisonline.com or call 1-866-348-6466.

Indices are unmanaged and do not include the effect of fees. One cannot invest in an index.

Performance data shown prior to 12/03/2021 is that of the funds of the Catholic United Investment Trust (the "Predecessor Funds"). The Predecessor Funds were managed by the Adviser using investment objectives, strategies, policies and restrictions that were in all material respects equivalent. The performance information has been adjusted to reflect Fund expenses which may result in higher or lower performance.

*Teachers Advisors LLC ("TAL"), a investment adviser subsidiary of Nuveen ("TAL/Nuveen"). Nuveen is the wholly owned investment manager subsidiary of TIAA. Nuveen provides investment advisory solutions through its investment specialists including Teachers Advisors, LLC, a registered investment adviser, and sub-advisor to the CRI Short Duration Bond Fund.

Before investing you should carefully consider the new Funds' investment objectives, risks, charges and expenses. This and other information is available in the prospectus, or summary prospectus. Please read the prospectus carefully before you invest. The prospectus, or summary prospectus, can be obtained by calling 1-866-348-6466.

Mutual fund investing involves risk, including possible loss of principal. There can be no assurance that the Fund will achieve its stated objectives. Current and future holdings are subject to risk. Bonds and bond funds are subject to interest rate risk and will decline in value as interest rates rise. Bonds and bond funds generally decrease in value as interest rates rise. Mortgage-backed securities are subject to prepayment and extension risk and therefore react differently to changes in interest rates than other bonds. Small movements in interest rates may quickly and significantly reduce the value of certain mortgage-backed securities. There is no guarantee that the Fund's income will be exempt from federal or state income taxes. Capital gains, if any, are subject to capital gains tax. Bonds and bond funds will decrease in value as interest rates rise. Income from municipal bonds may be subject to the alternative minimum tax. An investment in the fund(s) is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Effective Duration is a calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change.

Yield to Maturity is the rate of return anticipated on a bond if it is held until the maturity date. It is considered a long-term bond yield expressed as an annual rate.

Sharpe Ratio is a measure that indicates the average return minus the risk-free return divided by the standard deviation of return on an investment.

Standard Deviation measures the dispersion of a set of data from its mean. The more spread apart the data, the higher the deviation. Standard deviation is calculated as the square root of variance. In finance, standard deviation is applied

to the annual rate of return of an investment to measure the investment's volatility. Standard deviation is also known as historical volatility and is used by investors as a gauge for the amount of expected volatility.

Tracking Error shows a discrepancy between the price behavior of a position or a portfolio and the price behavior of a benchmark.

The Bloomberg U.S. 1-3 Year Treasury Bond Index measures the performance of the US government bond market and includes public obligations of the U.S. Treasury with a maturity between 1 and up to (but not including) 3 years. Bloomberg Index Services Limited: BLOOMBERG® is a trademark and service mark of Bloomberg Finance L.P. and its affiliates (collectively "Bloomberg").
