Returns are presented net of fees and include the reinvestment of income and past performance is not indicative of future results. Net of fees includes management fees, operating expenses, and fee reductions and/or expense reimbursements. See the fund prospectus for additional information.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be higher or lower than the performance quoted. For performance current to the most recent month end, please visit our website at www.cbisonline.com or call 1-866-348-6466.

Indices are unmanaged and do not include the effect of fees. One cannot invest in an index.

Performance data shown prior to 12/03/2021 is that of the funds of the Catholic United Investment Trust (the "Predecessor Funds"). The Predecessor Funds were managed by the Adviser using investment objectives, strategies, policies and restrictions that were in all material respects equivalent. The performance information has been adjusted to reflect Fund expenses which may result in higher or lower performance.

3-Month / YTD Review

- The Fund outperformed the Benchmark with positive results from allocation and selection, with most of the excess return due to stock selection.
- Overweight to Information Technology and underweights to Energy and Financials had the biggest positive impact on the relative performance. Slightly offsetting those sectors were an underweight to Communication Services and a small allocation to cash.
- Stock selection was positive in almost all sectors, but particularly in Financials, Consumer Staples, and Information Technology.

Current Positioning

- Positioning is relatively stable quarter to quarter. Within the developed markets, positioning is determined by the composite bottom-up research-driven security selection.
- About 82% of the Fund's market value is invested in developed nation securities and 18% in emerging markets.
- Information Technology and much more modest overages in Consumer Discretionary, Consumer Staples, and Industrials are overweighted compared to the Benchmark. The Fund has slight underweights in all the other sectors.

Before investing you should carefully consider the new Funds' investment objectives, risks, charges and expenses. This and other information is available in the prospectus, or summary prospectus. Please read the prospectus carefully before you invest. The prospectus, or summary prospectus, can be obtained by calling 1-866-348-6466.

Mutual fund investing involves risk, including possible loss of principal. There can be no assurance that the Fund will achieve its stated objectives. Current and future holdings are subject to risk. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume.

Price/Book is a ratio used to compare a stock's market value to its book value.

Price/Earnings is the ratio for valuing a company that measures its current share price relative to its per-share earnings. P/E helps to determine the relative value of a company's shares in an apples-to-apples comparison.

The MSCI ACWI ex USA Index captures large- and mid-cap representation across 22 of 23 Developed Markets (DM) countries (excluding the U.S.) and 27 Emerging Markets (EM) countries. The index covers approximately 85% of the global equity opportunity set outside the U.S.

The Catholic Responsible Investments International Equity Fund is distributed by SEI Investments Distribution Co. (SIDCO) which is not affiliated with CBIS.
