#### CRI Magnus 45/55 Fund Review

Global markets had a strong fiscal year. The Federal Reserve joined other central banks towards the end of the period in rate cuts. China's stimulus led to a sharp equity rally, after years of weak performance. Global inflation improved, corporate profits were solid, and the economy stayed strong, though some weak data caused volatility, especially in August. Investors are now focused on growth and the potential for a soft landing as inflation declines. The fiscal year ended on an optimistic note with signs of economic resilience. The fund generated positive returns and slightly underperformed the benchmark net-of-fees due to relative underperformance in the US large cap equity allocation.

### Householding

Rule 30e-1 of the Investment Company Act of 1940 permits funds to transmit only one copy of a proxy statement, annual report or semi-annual report to shareholders (who need not be related) with the same residential, commercial or electronic address, provided that the shareholders have consented in writing and the reports are addressed either to each shareholder individually or to the shareholders as a group. This process is known as “householding” and is designed to reduce the duplicate copies of materials that shareholders receive and to lower printing and mailing costs for funds. Once implemented, if you would like to discontinue householding for your accounts, please call toll-free at 866-348-6466 to request individual copies of these documents. Once the Fund receives notice to stop householding, we will begin sending individual copies 30 days after receiving your request.
